

DERMAL FILLER POST TREATMENT INFORMATION

Avoid the following for at least 24-72 hours:

- Massaging or putting excessive pressure on the treatment area

It is also recommended to avoid for 2 weeks:

- Extended exposure to UV light
- Extended exposure to heat or freezing temperatures

It is recommended not to apply make-up for 12 hours after the injection.

Common side effects are:

- Redness, swelling, small bruises and/or lumps at injection sites. Firm massage or pressure to treatment areas should be avoided for 2 weeks.

Less common side effects are:

- Extensive bruising, swelling, tenderness post procedure

Rare complications:

- Infection, abscess, blocking of blood vessel (causing damage to surrounding tissue) skin pigmentation change. Please call the rooms on 9740-2409 if you feel you are experiencing any of these, as they require review as soon as possible.
